PROFESSIONAL SUMMARY

Full-Stack Developer with a foundation in HTML, CSS, and JavaScript, actively developing specialized AI engineering skills including prompt engineering. Computer Science undergraduate combining self-directed technical learning with hands-on freelance content delivery. Targeting Full-Stack Developer (AI Focus) and AI Engineer Intern roles to apply web development skills to AI-powered application development.

EDUCATION

B.Tech in Computer Science | Expected 2028

GL Bajaj Group of Institutions, Mathura | CGPA: 8

EXPERIENCE

Freelance Content Writer | Independent Clients

2025 (3 months)

- Wrote blog posts, articles, and product descriptions for independent clients across varied topics and industries
- Managed client requirements independently and delivered content on schedule while maintaining quality and tone consistency
- Strengthened research, writing clarity, and client communication skills through direct freelance collaboration

PROJECTS

No completed projects on record yet. Actively building portfolio projects in LLM application development (e.g., RAG pipelines, AI agents using LangChain/LangGraph) — recommended next step to strengthen this section and directly target AI Engineer Intern roles.

SKILLS

Programming Languages: JavaScript, Java

Web Development: HTML, CSS, JavaScript

AI & Prompt Engineering: Prompt Engineering

Tools & Platforms: Git, GitHub, VS Code

CERTIFICATIONS

None on record. Adding a relevant certification (e.g., a foundational Python or LLM/prompt engineering course) would strengthen ATS keyword matches for AI-focused roles.
